

# ReadSpeaker for Canvas: Getting Started

You are ready to launch once you have implemented ReadSpeaker within your Learning Management System (LMS) testing environment!

## Ways to Introduce ReadSpeaker

Your students and faculty need to know what ReadSpeaker is, what it can do for them, and why they should use it! The more faculty promote the product and demonstrate its use, the more students will utilize it to achieve success. Below are some resources.

## Repeat Messaging

Many successful implementations involve repeating messages to their users. We suggest repeating the announcement item to draw attention to the ReadSpeaker Suite of Learning Tools each term and at key points during the term. We understand that your semester can be filled with many activities and that dates can sometimes get lost. To assist with repeat messaging, we suggest adding a reminder to your calendar to reset the dates on your post.

Let's get started! On the next page, you will find various activities for introducing the ReadSpeaker Suite of Learning Tools to your faculty and students. You will notice that your audience is listed for each activity. Check off each item as you do it.

You will notice that most items listed have support documents in this zipped package. If you require additional support information, please get in touch with the Educational Development Manager.
