

# ReadSpeaker for the Open LMS: Getting Started

You are ready to launch once you have implemented ReadSpeaker within your Learning Management System (LMS) testing environment!

## Ways to Introduce ReadSpeaker

Your students and faculty need to know what ReadSpeaker is, what it can do for them, and why they should use it! The more faculty promote the product and demonstrate how to use it, the more students will use the product to be successful. On the [Open LMS Packet page](#), you will find the links to the following:

1. ReadSpeaker for the Open LMS: Getting Started
2. ReadSpeaker for the Open LMS: Faculty Email
3. ReadSpeaker for the Open LMS: Accessing webReader and docReader
4. ReadSpeaker for the Open LMS: Accessing webReader, docReader, and TextAid
5. ReadSpeaker for LMSs Support Page
6. ReadSpeaker for the Open LMS: Training PowerPoint
7. ReadSpeaker Button Highlights Handout docReader, webReader, and TextAid
8. ReadSpeaker Button Highlights Handout docReader and webReader

9. ReadSpeaker for the Open LMS: Why Should I Use It?
10. ReadSpeaker Posters
11. [Link to SoftChalk lessons](#)
12. [VPAT and Product Specifications](#)
13. [Customer Portal Guides](#)
14. [YouTube Playlists](#)

## Repeat Messaging

Many successful implementations involve repeating messages to their users. We suggest a repeat announcement item to draw attention to the ReadSpeaker – Suite of Learning Tools each term and at key points during the term. We understand that your semester can be filled with many activities and that dates can sometimes get lost. To assist with repeat messaging, we suggest that you add a reminder to your calendar to reset the dates on your post.

Let's get started! In the table on the next page, you will find various activities for introducing the ReadSpeaker – Suite of Learning Tools to your faculty and students. You will notice that your audience is listed for each activity. Check off each item as you do it.

The Open LMS Packet webpage has support documents for most items listed. If you need additional support information, please contact the Educational Development Manager.

ReadSpeaker webReader is located for all HTML parts of your Open LMS, and ReadSpeaker docReader reads your documents. (See the product specifications for the types of documents.)

<b>Activity</b>	<b>Audience</b>
Email	Faculty, Students, Administration
Posters and Social Media	Faculty, Students, Administration
Workshop	Faculty, Students
Onboarding/Professional Development	Faculty
LMS Announcement and Video	Multi-audience message to all LMS-users
Website	Faculty – Teaching/Resource Site Student – Resource Site
