ReadSpeaker for the Open LMS: Why Should I Use It?

ReadSpeaker tools are more than just text to speech. They also give the ability to process information differently. Examples:

- If you learn from an oral presentation, use ReadSpeaker to listen to your lesson/s.
- If you are studying a complex subject, listen to the material while you are reading it. The two processes of seeing the words (highlighting words and sentences with ReadSpeaker) and hearing the words are a form of bimodal presentation. Bimodal presentations have been shown to increase the retention of materials. Enlarged text with a slower reading speed also helps learners comprehend complex materials by allowing time to digest the information in smaller quantities.
- If you are taking a test, you may benefit from hearing the test to catch all the words and understand the questions better.
- Learning on the go: Download your lesson pages to mp3 files and listen to them while offline. Use the "Download to mp3" button, located on the lower toolbar.
- Click the Listen Button to activate ReadSpeaker. Then, you can position the player on the desired page.
- You can change the reading speed, the text highlighting, or download the file. Customize it to your learning methodology!

See the next page for an image of ReadSpeaker webReader with explanations for each tool.

Easily Distracted While Reading?

- Select the Page Mask available in ReadSpeaker webReader and ReadSpeaker docReader. When activated, the page mask tool grays out the screen above and below the selected material. It will scroll with you as you move down the page. You can customize the window's width.
- Use ReadSpeaker docReader with the course content documents and select the Reading Ruler. When activated, the reading ruler tool grays out the material below it. The ruler's width is customizable. Use it like a note card on a paper document or book.
- Do you need to adjust the font, font size, background/text color, or character spacing? If so, use Text Mode and make the adjustments to your preferences.
- Low vision or easily distracted? Use the Enlarge Text tool, which magnifies
 the text and shows it at the bottom of the page. The eye is naturally
 drawn to it.

There are many other ways to utilize the ReadSpeaker Suite of Learning Tools to support your learning.
