(Based on VPAT® Version 2.5)

"Voluntary Product Accessibility Template" and "VPAT" are registered service marks of the Information Technology Industry Council (ITI)

Name of Product/Version: ReadSpeaker webReader, version 3.8.11 and higher; current version 3.8.11

Report Date: 17 August 2026

Product Description: webReader is a web-based text-to-speech solution that is embedded into customer websites as a third-party JavaScript component. It provides an on-page user interface that enables end users to listen to website content, with playback controls and related settings available via the webReader player and dialogs. In addition to text-to-speech, webReader can provide optional built-in tools such as Translation (translating user-selected text), Dictionary (definitions for selected words), Page Mask (reducing visual distractions), AI-based summarization/easy reading views, MP3 download of spoken content, and other configurable features.

During playback, webReader highlights the currently read content in the host page, including word and sentence highlighting, to help users follow along visually. The accessibility evaluation in this report focuses on webReader's own UI components (e.g., player controls, menus, settings dialogs, help content, and built-in tool dialogs) as delivered to end users when the component is running on a host website.

Notes: This report was created by Deque Systems Inc. upon completion of an accessibility evaluation performed between April 19, 2026 and July 13, 2026.

This report also reflects remediation performed in July 2026, of issues identified in the initial assessment. Each remediated issue was validated using the same testing techniques that were employed in the initial assessment.

Evaluation Methods Used: A combination of automated and manual testing techniques was employed for the accessibility audit. Manual audit was performed using Windows/Chrome and included exclusive use of the keyboard. Automated tools used included Axe Auditor and the Axe DevTools browser extension. Assistive technologies employed included NVDA.

Report revision history: This Accessibility Conformance Report (ACR) is based on the evaluation by [Deque Systems Inc.](#) between April and July 2026. ReadSpeaker released previous ACRs in March 2026 and September 2025 (VPAT 2.5), August 2023, and February 2023 (VPAT 2.4).
