Conformance: Level AA

I hereby declare that:

ReadSpeaker webReader has undergone several WCAG accessibility evaluations over time, including both independent third-party reviews and internal accessibility assessments. Earlier assessments of webReader 3.6 and 3.8 provide a strong historical foundation and confirm a high level of accessibility in the product's core functionality. Most recently, webReader 3.8.7 was evaluated by [Proper Access](#), with final approval dated 15 April 2025. That evaluation found the product compliant with all assessed WCAG 2.2 Level A and AA success criteria. Find the [report here](#).

ReadSpeaker has also completed an internal Accessibility Conformance Report (VPAT) for webReader 3.8.9, dated 2 March 2026, covering WCAG 2.0, 2.1, and 2.2 Level A and AA, based on a combination of manual and automated testing.

Based on these evaluations, and following remediation of the issues identified during the internal review, ReadSpeaker declares that webReader 3.8.7 and higher conform to the applicable WCAG 2.2 Level A and AA success criteria within the scope of the evaluated product interface.
